Aurora Cloud - API Service Level Agreement

1. Uptime Commitment and Service Credits

Aurora Cloud guarantees 99.9% monthly uptime for the Production API tier. Uptime below this threshold entitles the customer to service credits.

Service credits are issued as follows: 10% of monthly fees for uptime between 99.0% and 99.9%; 25% of monthly fees for uptime between 95.0% and 99.0%; and 50% of monthly fees for uptime below 95.0%.

Scheduled maintenance windows, announced at least 72 hours in advance, are excluded from uptime calculations.

Customers must submit service credit claims within 30 days of the end of the affected billing month.

2. Rate Limits and Support Response Times

The Free tier is limited to 60 requests per minute and 10,000 requests per month. The Pro tier is limited to 600 requests per minute with no monthly cap. The Enterprise tier has custom rate limits negotiated per contract.

Requests exceeding the rate limit receive an HTTP 429 response with a Retry-After header indicating the number of seconds to wait.

Support response time targets are: Enterprise tier, 1 hour for critical issues; Pro tier, 4 business hours for critical issues; Free tier, best-effort via community forum only.

Critical issues are defined as a complete API outage or data loss; all other issues are classified as standard priority with a 2 business day response target.
