# GreenLeaf Energy - 2025 Sustainability Report Summary

## Emissions and Renewable Energy Targets

GreenLeaf Energy committed to reducing Scope 1 and Scope 2 greenhouse gas emissions by 45% from a 2019 baseline by the end of 2030, and achieved a 28% reduction by the end of 2025.

Renewable sources supplied 62% of total operational energy use in 2025, up from 41% in 2022, with a target of 90% by 2028.

The company's largest single emissions source remains diesel generators at remote sites, accounting for 34% of total Scope 1 emissions in 2025.

GreenLeaf purchased 120,000 MWh of certified renewable energy credits in 2025 to offset remaining non-renewable grid usage.

# GreenLeaf Energy - 2025 Sustainability Report Summary

## Water Usage and Supply Chain Audits

Freshwater withdrawal per unit of production decreased by 19% between 2022 and 2025 through closed-loop cooling system upgrades at 6 facilities.

100% of tier-1 suppliers completed an environmental and labor practices audit in 2025, up from 78% in 2023.

Of the 14 tier-1 suppliers audited in 2025, 2 were placed on a 90-day corrective action plan for water discharge violations.

GreenLeaf plans to extend mandatory audits to tier-2 suppliers starting in 2027.
